

Air Pillows for void-fill and protective packaging made from DuraClear™ 2000 Enhanced Linear Low Density Polyethylene — System-matched material for superior performance

The AirPouch Express 3 Void-fill System uses DuraClear 2000 (DC2) material for strong, durable air pillows that improve protection while reducing packing and shipping costs.

DC2 is a specially formulated, linear low density polyethylene with superior durability, puncture-resistance, clarity and strength. AirPouch air pillow material is manufactured in Automated Packaging's own ISO 9001/2000 registered plants in the US and Europe. Material uniformity and integrity exceed quality standards established by the FPA (Flexible Packaging Association).

Only AirPouch air pillows have the unique EZ-Tear™ Perforations, which allow quick and easy separation of the pillows for fast and efficient packing. These specially designed

perforations also allow more air into each pillow, providing better yield, a lower cost per cubic foot, and less weight per package.

User Benefits

- EZ-Tear Perforations are packer-friendly and designed for efficiency and ergonomics
- Boxed material provides more cubic feet of material per box for fewer, faster changeovers and less lifting
- Improved yield reduces material cost per cubic foot and weight per package for lower shipping costs
- Dust-free, transparent pillows are clean and allow product to show through packing
- Air pillows are inflated at speeds over 50 feet per minute for high-productivity operations

Technical Specifications for AirPouch 2 mil DC2 Air Pillows

- **Available sizes:** 8 inches wide with lengths of 4, 6, 8, 10 and 12 inches
- **Unit of measure:** Each box has 3,000 linear feet of material; 24 boxes per pallet
- **Printing:** Available in unprinted, stock printed, or custom printed
- **Puncture resistance (*Dart g*):** 345 grams
- **Tensile strength (*machine direction*):** 5,906 PSI
- **Tensile strength (*transverse direction*):** 5,334 PSI
- **Haze:** 14.2%
