

Powder Pack Detergents

North America's #1 Name in High-Pressure Cleaning Equipment

Concentrated Biodegradable Detergent for Pressure Washers

One Pack Makes 5 Gallons

EASY TO USE

Hotsy offers five varieties of powder pack detergents for use in our line of industrial-grade pressure washers. Hotsy powder pack detergents are easy to use. Simply place the detergent in a bucket and add water. The inner film that holds the detergent will self dissolve, and makes 5 gallons of detergent, ready for use.

AVAILABLE IN THESE 5 VARIETIES:

- General Purpose Cleaner
- Deck & Fence Cleaner
- House & Siding Wash
- Driveway & Concrete Cleaner
- Truck & Car Wash

STEP-BY-STEP INSTRUCTIONS:

1 Remove detergent label from plastic clamshell. Remove the plastic polybag surrounding detergent powder package by cutting the bag where indicated. Be careful not to tear the inner film protecting the detergent. Drop soap packet into 5 gallon bucket or pail.

2 Add enough water from a garden hose to fill the 5 gallon pail; aim the water stream directly on the detergent powder pack. The force of the water will mix the detergent and the exterior film will dissolve.

3 Place injector pick-up line from the pressure washer into pail. Wash surface from the bottom up, and rinse from the top down.

Hotsy Powder Packs Concentrated Biodegradable Detergent

Highly concentrated

- A little goes a long way
- Dilution ratio up to 20:1

Competitively priced
